

Mitsubishi Electric Corporation

GENESIS64

Integrated monitoring solution for monitoring, control, and analysis of a wide variety of data

» Product features

- **Monitor various data in production site**

Monitor various data on beautiful graphical screens by advanced visualization such as 3D display and a wide variety of symbols.

- **Remote Monitoring for production site**

Access and monitor important data from anywhere with web browser or mobile device

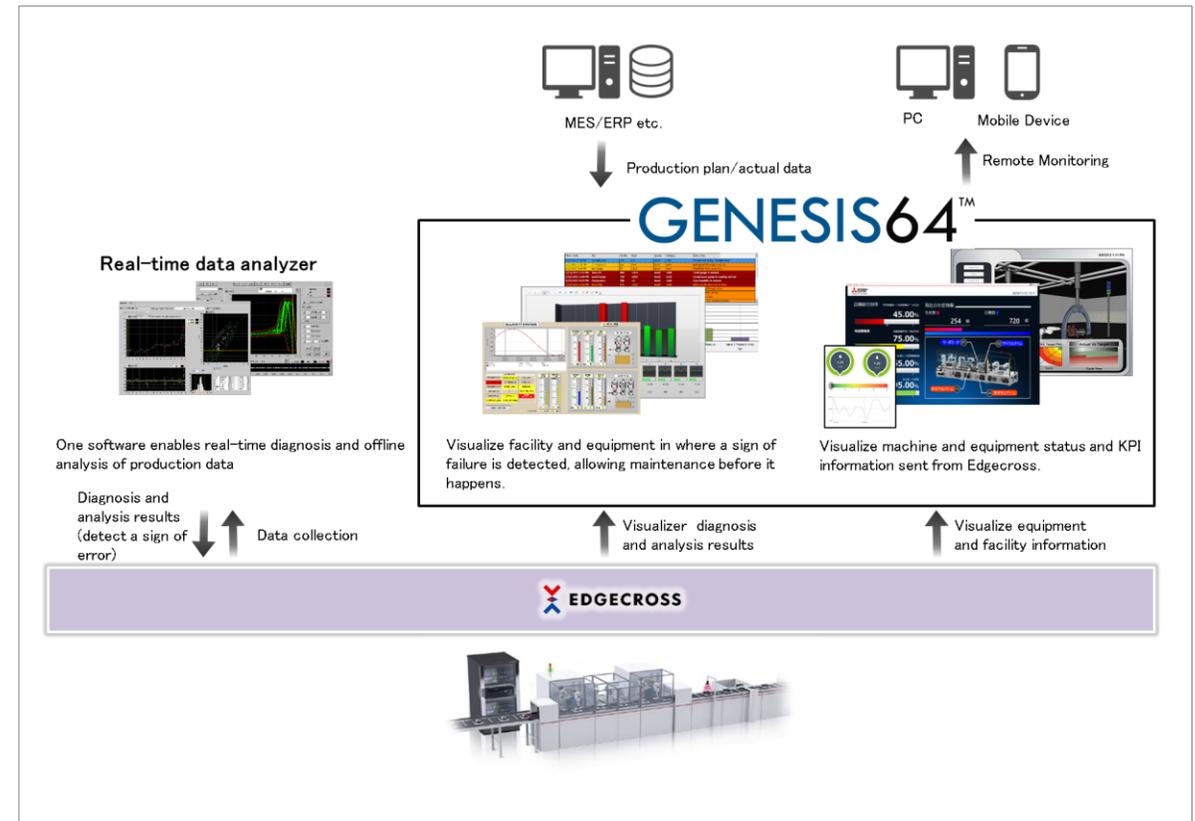

- **Combination with higher-level systems**

Acquire production plan/actual data from higher-level systems such as MES/ERP and use it for data analysis.

- **Combination with Edgexcross**

Realize visualization of operating and diagnostic information by combination with Edgexcross
